

ZEZ SILKO s.r.o. is a reputable manufacturer of power capacitors, capacitors for power electronics, capacitors for induction heating and many other capacitor types. Company ZEZ SILKO s.r.o. provides complete power factor correction service including: power system evaluation including harmonic analysis, technical and commercial quotations, capacitor banks production and commissioning. Components for power factor correction and regulation of electrical energy are also supplied. ZEZ SILKO products are being exported to countries all around the world. They are for use on traction systems (locomotives, trams, trolleybuses), green energy generation (wind and photovoltaic power plants), energy sector (power factor correction) and also induction heating equipment. ZEZ SILKO s.r.o. has always been and will continue to be your reliable business partner.

## DC link capacitors

➤ DC filters of power converters

**Voltage:** up to 6 kV DC

**Capacitance:** up to 20 000  $\mu$ F

**Low stray inductance**

## AC filter capacitors

➤ Power converters (AC current filtering)

**Voltage:** up to 3,5 kV AC

**Capacitance:** up to 600  $\mu$ F

## Snubber capacitors

➤ Semiconductors protection (IGBT, SCR)

**Voltage:** up to 10 kV DC

**Capacitance:** up to 25  $\mu$ F

**Extremely low stray inductance**

European manufacturer  
of capacitors

1

Emphasis to quality of  
products

IRIS certification since  
2014

Tradition of capacitor  
production since 1930

Quality control system (ISO 9001)  
since 1999

Products are exported to countries  
all around the world
